

# Polaré lenses, unmatched in the over prescription sunwear category.

Cocoons and Vistana OveRx sunwear collections feature the proprietary Polaré lens system to deliver optical grade visual acuity and durability, unmatched in the over prescription sunwear category. Available in copper, gray, amber, yellow and blue mirror to meet the needs and preferences of every prescription eyeglass wearer.

## COPPER

Copper reduces scattered blue light while transmitting more green, yellow and orange wavelengths to the eye. The resulting effect is an improved level of contrast that sharpens object definition and is ideal for use in varying and flat light conditions.

## GRAY

Gray is a neutral tint that delivers true color perception and natural contrast. This general purpose tint is ideal for daily wear and a variety of outdoor activities where intense, bright light is encountered.

## AMBER

Copper reduces scattered blue light while transmitting more green, yellow and orange wavelengths to the eye. The resulting effect is an improved level of contrast that sharpens object definition and is ideal for use in varying and flat light conditions.

## YELLOW

Gray is a neutral tint that delivers true color perception and natural contrast. This general purpose tint is ideal for daily wear and a variety of outdoor activities where intense, bright light is encountered.

## BLUE MIRROR

Polaré® polarized gray is also available with a blue mirror coat designed to eliminate additional glare and increase contrast. Allows 11% light transmission with true color definition.

## UV400 PROTECTION

Polaré lenses block 100% of damaging UVA&B light, providing maximum eye protection from harmful ultraviolet light exposure.

## SCRATCH RESISTANT

Polaré lenses are extremely durable and feature a chemically bonded hard coat that resists scratches and scuff marks that can reduce the optical clarity of the lens.

## POLARIZED

By eliminating harsh, blinding glare, the Polaré lens allows the eyes to relax and remain focused, improving visual acuity and providing a soothing environment for the eyes.

## ONE YEAR WARRANTY

Polaré lenses are constructed from distortion-free optical grade lens material that is extremely scratch resistant and durable. All Polaré lenses feature a manufacturer's one year scratch resistance warranty.
